HUNTER & CO. WORKFLOW CONSULTING LLC

Catalog normalization pilot order

One product family, one authorized export and up to 500 SKU rows.

$750 USD	Up to 500 rows	5 business days

Buyer legal name

HWC order reference

Buyer reviewer and work email

Billing and service location (city, state, country)

Product family and authorized source file / version

Agreed fields and value or unit rules (or reference)

Confirmed staffed start date

Approved file transfer route

What we will deliver

We audit each supplied row and normalize the agreed fields using values supported by the authorized structured source. We return a corrected CSV keyed to your original SKU, evidence for changes and a separate exception list for missing or conflicting information. Every supplied row is accounted for.

You retain publishing control. New attribute research, PDF or CAD extraction, live-system changes and separately licensed dictionaries require their own scope.

Start, payment and review

Both parties sign, agree on the staffed date and confirm the source, file handoff, service location and applicable tax. The $750 fee is due in full before work starts. HWC confirms the actual start after funds clear and the agreed files arrive. Delivery is due within five business days of that start.

Your reviewer has five business days after delivery to accept by email or send the affected row IDs and unmet checks. HWC corrects in-scope errors at its expense and returns the file for review.

Credit toward production

The full $750 applies once to a production enrichment agreement for the same scope signed by both parties within 14 calendar days of delivery. Standard enrichment is $1.25-$1.50 per SKU. Production pricing, quantity and timing are agreed separately.

The buyer confirms it has authority to share the identified source. Return the signed order to HWC.
