Files and deliverables

Provide one CSV or XLSX export, its category map and up to eight attributes with allowed units or values. We check missing values, units, duplicates and categories. For a chargeback review, provide the retailer rules and deduction notices you may share. We match notices to SKU rows and flag unresolved links and amounts.

You receive an editable findings file keyed to source rows, a field map, five worked examples and an exception queue. The summary reconciles to the rows supplied. We cite evidence for corrections and flag unknowns for review. You retain decisions on disputes. Production enrichment and live catalog changes require a separate order.

Start, payment and acceptance

Both parties confirm a staffed start date and sign this order. We then issue a $750 Stripe payment request. Work starts on the confirmed date once the full payment clears and the agreed files arrive. If either arrives late, both parties confirm a revised start. Delivery is due within five business days of the actual start.

The reviewer has five business days after delivery to accept by email or send one list of row IDs and unmet checks. We correct in-scope errors at no charge and return the file for written acceptance.

Credit toward full enrichment

If both parties sign a full enrichment order within 14 calendar days of audit delivery, we credit the entire $750 once toward that order. Standard production is $1.25 to $1.50 per SKU. Both parties agree to scope and schedule in writing.

Confirmed staffed start date

Approved file transfer route

The buyer confirms it can share the export. The identified master agreement, if any, applies. Both authorized representatives sign this order. Return the signed copy to Hunter using the email below.
